MSDS COVER SHEET

Pages including cover sheet: 8

Product Name: **Activator**

Catalog Number: **30-3100-XX, 30-3102-XX,**

Product Description: 1H-Tetrazole in Anhydrous
Acetonitrile

Glen Research Corporation provides Material Safety Data Sheets (MSDS) based on the hazardous components of each product.

Components and MSDS attached

Acetonitrile (97%)	CAS number	75-05-8
1H-Tetrazole (3%)	CAS number	288-94-8

Section I: Identification & Information

Name: Acetonitrile

Chemical Family: Nitrile

Synonyms: Methyl Cyanide, Cyanomethane, and Ethyl Nitrile

Formula: CH₃CN

M.W.: 41.05

DOT Proper Shipping Name: Acetonitrile

DOT Identification No.: UN1648 CAS No.: 75-05-8

DOT Hazard Class: Flammable Liquid

Section II: Physical Properties

Appearance: Clear, colorless liquid
Vapor Pressure @ 20°C: 73mmHg
Percent Volatile by Volume: ca 100
Evaporation Rate (BuAc =1): 5.79
Boiling Point: 180°F (82°C)
Freezing point: -46°C (-51°F)

Odor: Sweet, aromatic; ether-like
Vapor Density (air=1): 1.42
Specific Gravity (H₂O=1): 0.7857
Stability: Stable
Solubility in H₂O: Soluble
Water Reactive: n/a

Section III: Reactivity Hazard Data

Stable material at room temperature in closed containers under normal storage and handling conditions. Hazardous polymerization is not expected to occur.

Conditions to avoid: Heat, sparks, open flames, open containers, poor ventilation, and direct sunlight.

Materials to avoid: Strong oxidizing agents and strong acids and bases (e.g. chlorosulfonic acid), explosives, nitrogen-fluorine compounds, sulfites, perchlorates, reducing agents, and plastics.

Hazardous decomposition products: Incomplete combustion can generate hydrogen cyanide and other toxic vapors.

Emergency First Aid:

- Ingestion: Call poison control center for assistance. Get emergency medical assistance. If conscious, and alert, give 2-4 cupfuls of water or milk. Never induce vomiting or give anything by mouth to a victim who is unconscious or having convulsions. Trained persons may administer amyl nitrate by inhalation as antidote where stupor or unconsciousness occurred.
- Eye contact: Rinse with copious amounts of water for at least 15 minutes. Get emergency medical assistance.
- Skin contact: Flush thoroughly with water for at least 15 minutes. Wash affected skin with soap and water. Remove contaminated clothes and shoes. Wash clothing before reuse. Get emergency medical assistance.
- Inhalation: Immediately remove to fresh air. If not breathing, give artificial respiration. Keep patient warm and at rest. Get emergency medical assistance.

Section VII: Special Protection

Ventilation: Adequate ventilation is required to control vapors and odor.

Respiratory Protection: Use approved respiratory equipment. Follow NIOSH and equipment manufacturer's recommendations to determine appropriate equipment.

Skin Protection: Protective rubber gloves and clothing are recommended. The choice of material must be based on chemical resistance and other user requirements.

Eye Protection: Laboratory safety glasses are minimum protection. Goggles are preferred.

Emergency eye wash fountains and safety showers should be available in the vicinity of any potential exposure. Ground and bond metal containers to minimize sparks.

Section VIII: Spill and Disposal Procedures

Wear protective clothing and use approved respiration equipment. If a spill occurs, protect from ignition. Use water spray to dilute spill to a non-flammable mixture. Ventilate area of spill. Absorb spilled material in an absorbent recommended for solvent spills and scoop with a nonsparking tool. Remove waste to a safe location for disposal by approved methods. If released to the environment, comply with all regulatory notification requirements.

Waste Disposal: Dispose of acetonitrile as an EPA Hazardous Waste.

Section IX: Storage

Acetonitrile should be stored in a cool area away from ignition sources, combustibles and oxidizing materials. Protect from temperature extremes and direct sunlight.

This chemical is subject to the notification requirements of section 313 of the Emergency Planning and Community Right-to-Know Act of 1986. This law requires certain manufacturers to report on annual emissions of specified toxic chemical and chemical categories.

The information provided herein is based on sources believed to be reliable as of 4/5/01 and pertains only to the material designated. Glen Research Corporation makes no warranty or representation to its completeness, accuracy, or currency. This material is intended for use by persons with pertinent technical skills and at their discretion and risk. It is the responsibility of the user to determine the product's suitability for its intended use, the product's safe use, and the product's proper disposal. Disposal of hazardous material may be subject to federal, state or local laws or regulations.

Key:

ca: Approximately

PEL: Permissible Exposure Level

STEL: Short Term Exposure Level

TWA: Time Weighted Average

IDLH: Immediately Dangerous to Life and Health

Section I: Identification & Information

Name: 1H-Tetrazole
Chemical Family: Heterocycle

Synonyms: Tetrazole
Formula: CH_2N_4 M.W.: 70.05

DOT Proper Shipping Name: 1-H Tetrazole
DOT Identification No.: UN0504 CAS No.: 288-94-8
DOT Hazard Class: Explosive
Rail and air transportation are forbidden

Section II: Physical Properties

Appearance: White crystalline powder	Odor: Odorless
Vapor Pressure @ 20°C: n/a	Vapor Density (air=1): n/a
Percent Volatile by Volume: n/a	Specific Gravity ($\text{H}_2\text{O}=1$): n/a
Evaporation Rate (BuAc =1): n/a	Solubility in H_2O : 23g/100mL (20°C)
Boiling Point: n/a	Melting point: 154-158°C
Stability: Stable at normal temperature and pressure. May decompose rapidly and explosively if heated above melting point.	

Section III: Reactivity Hazard Data

Hazardous polymerization will not occur.

Conditions to avoid: Heat, open flames, open containers, poor ventilation.

Materials to avoid: Strong oxidizing materials, strong acids, acid chlorides and acid anhydrides. Avoid temperatures above 154°C.

Hazardous decomposition products: Carbon monoxide, carbon dioxide, and nitrogen oxide compounds.

Section VII: Special Protection

Ventilation: Mechanical ventilation is required to eliminate dust.

Respiratory Protection: NIOSH approved respirators.

Skin Protection: Protective rubber or neoprene gloves and clothing are recommended.

Eye Protection: Laboratory safety glasses are minimum protection. Goggles or faceshield are preferred. Contact lenses should not be worn when working with this material.

Emergency eye wash fountains and safety showers should be available in the vicinity of any potential exposure.

Section VIII: Spill and Disposal Procedures

Sweep up spilled material, place in a bag and hold for waste disposal. Use approved respiratory protection. Avoid raising dust. Ventilate area and wash spill site after material pickup is complete.

Waste Disposal: Dissolve or mix with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber. Dispose in accordance with all federal, state, and local environmental laws.

Section IX: Storage

Avoid contact with skin, eyes, and clothing. 1H-Tetrazole should be stored in a tightly sealed container. Store in a cool, dry place.
